

TRIANGLE, SINGLE SIDED

Part code	Description
68.000.000	Triangle single sided starter section, roof of aluzinc sheets
68.010.000	Triangle single sided add-on section, roof of aluzinc sheets
68.020.017	back wall with 5 aluzinc sheets
68.040.017	side wall made of sendzimir galvanised sheets
68.050.017	side wall, starter element with 2 uprights and a aluzinc sheet
68.051.017	side wall, add-on element with 1 upright and a aluzinc sheet
68.100.000	single sided starter section, roof of aluzinc sheets, including lighting
68.110.000	single sided add-on section, roof of aluzinc sheets, including lighting
68.200.172	single sided starter section, roof of 10 mm safety glass sheets
68.210.172	single sided add-on section, roof of 10 mm safety glass sheets
68.300.172	single sided, starter section, roof of 10 mm thick safety glass, with lighting
68.310.172	single sided, add-on section, roof of 10 mm thick safety glass, with lighting

TRIANGLE, SINGLE SIDED

Triangle canopy system is part of a co-ordinated range of street furniture products which includes litter bins, seating, bollards, cycle stands and lighting.

The shelter brings the familiar design led 'triangle' theme to the fore and the use of a range of materials including stainless steel and powdercoated galvanised steel with roof cladding options of aluzinc or safety glass.

As with all Falco products, the aesthetic strengths of the design are matched by high functionality. The canopy incorporates integrated gutters with rainwater being channelled inside the structure and discharged at ground level.

Additionally lighting can be incorporated into the central panel of the canopy with opaque acrylic covering. Optional back wall panels include steel sheet or safety glass.

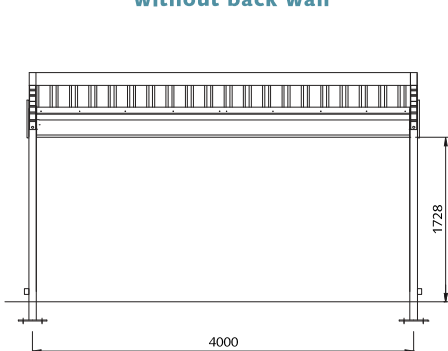

TRIANGLE CO ORDINATED PRODUCTS

Benches page no. 16 and 17. Litter bin page no. 85.

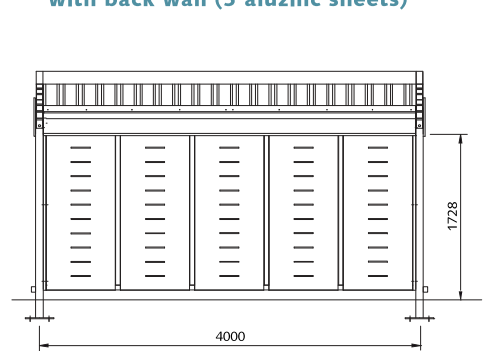

Bollards page no. 118.

Cycle parking systems page no. 166, 174, 175 and 176.

Triangle single sided starter section without back wall

Triangle single sided starter section with back wall (5 aluzinc sheets)

TRIANGLE, DOUBLE SIDED

Again there is a double sided canopy option making the Triangle a very versatile unit. Used as a standalone 'island' unit, the canopy creates a great design statement with a the symmetry of the canopy arms creating a light and spacious feel. By utilising the pierced side panels, the design also provides a feeling of privacy when a demarcation of some description is required to highlight a specific use for the space.

By placing two units facing each other a covered walkway or compound can be created. Utilising the 2.25m span for each arm, a walkway 4m wide is possible – ideal for a public thoroughfare. Like all Falco shelters, the modular nature of the Triangle canopies enables designers and specifiers to create a walkway system of any dimensions. Ideal for bus shelters, a public market, cycle parking or simple weather cover.
